It includes carefully chosen examples of chemists through the ages and reflects on the difficulties they overcame. Today we live in a world where scientists are accepted regardless of race or gender, however some examples show that this has not always been the case. Chemists in a Social and Historical Context focuses on strategies for teaching about people in chemistry and is an introduction to some chemists who played a role in the development of major ideas in the subject. This resource includes a range of activities designed to look at different aspects of teaching about people in chemistry and the chemical sciences to 11-19 year old students. It contains teachers notes, background information, photocopiable student worksheets and answers.
