Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1915 Excerpt: .from Ashley s standard curve. In the opinion of Ashley, the relative amount of colloid (jelly-like) matter in unit weight of clay may be found by determining the amount of malachite green adsorbed from a solution containing 3 grams of this substance per liter. By taking a very plastic clay (Tennessee ball clay) as the standard for comparison, the relative colloid value is made to express the colloid content compared with the standard. Mechanical analyses of loess f rom road cut a mile northeast of Grimsby. 1 Mechanical analyses of loess from road cut a mile northeast of Grimsby--Continued. One of the most interesting facts shown by these analyses is the confirmation of the inference that fine particles are beingcarried down from the surface to a position a few feet below the surface. The materials taken in the order of their depth below the surface contain about 25, 22, 29, 35, and 16 per cent of extremely fine particles. It appears not only that fine particles are being carried down a few feet, but that many are formed near the surface. The distribution is such as would result, for example, if the original amount of fine particles had been 15 per cent, and if the fine material formed at and near the surface, perhaps by the work of plants and frost, had been in a continual process of being carried down a few feet, the maximum amount being dropped about 4 feet below the surface. The...
