Excerpt: . . . for people with normal, healthy lungs may be more significant for individuals with preexisting lung disease. Certainly effects that could be incapacitating and could interfere with normal activity ( e. g. asthma attacks ) should be considered adverse. However, perceptions of what is a medically significant health effect will vary greatly among physicians and patients. Are there any subpopulations that are particularly susceptible to ozones ill effects In response to the Clean Air Acts mandate that EPA set air quality standards for pollutants, allowing an adequate margin of safety. . . to protect the public health, the EPA has sought to identify those subpopulations, if any, that are shown to be more sensitive to ozone exposure than the general population. Two major groups have been identified by EPA as being potentially at increased risk of developing adverse health effects from exposure to ozone: 1 ) a subgroup of the general population with preexisting disease (...)
