Not illustrated. 1874 Excerpt: . by the forked tailed lead worked slowly up the battery, till the fuse exploded, noting carefully the deflection of the needle of the galvanometer until explosion. We then substituted such metallic resistance in the circuit as (with the number of cells which had produced explosion) reproduced the noted deflection. The conduct of some of the fuses was strangely different from that of others; for instance, in the case of one with a resistance marked Infinite, that is to say, one which gave no indication of a current from two cells, the resistance suddenly broke down before the current from 21 cells giving a violent deflection at moment of firing only. But generally the deflection increased very fairly with the increased number of cells applied, as I tried to keep the influence of each degree of current power as nearly equal as I could, that is,...

Totally one of the better pdf I have at any time read through. It really is simplified but shocks within the 50 % from the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.
